PROUDLY MADE IN THE USA

Your Authorized Kardex Dealer

# LEKTRIEVER® SERIES 2000

The industry's most sophisticated vertical carousel

# LEKTRIEVER® SERIES 2000

Mix and match multi-media automated storage and retrieval

All electronic controls and fluorescent lighting components are located within the overhead concealment panel

Manually or electronically operated door provides security

Upper and lower safety touch bars with redundant Sentry photobeams provide operator safety

Waist-level access cover for manual operation

The movable work surface easily adjusts to either an ergonomically correct standing or seated position

Recessed toe panel allows for forward reach wheelchair access

Computerized, interfaceable tracking system increases productivity

Kardex introduces the **Lektriever Series 2000**, the industry's most sophisticated vertical carousel. The Lektriever Series 2000 offers unmatched use of floor space with the option of easy-to-use computerized access.

Information at your fingertips with the **KARDEX LEKTRIEVER**

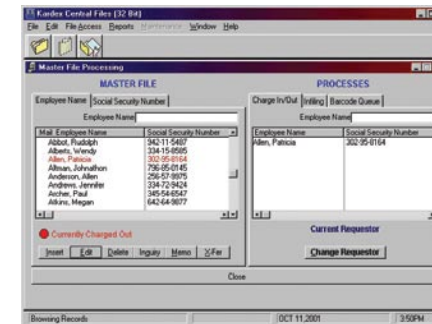

# Operator Control Console

## Sealed tactile keypad

The Lektriever's Operator Control Console (or OCC) places all of the operational controls at the operator's fingertips. Turn the machine on, raise or lower the electric door, turn on or off the fluorescent light or monitor a variety of control features from one ergonomically-correct position.

## Record-tracking software

Central Files for Windows® is an easy-to-use record tracking system, designed to further enhance the productivity of a Lektriever. It's included at no additional cost with the purchase of the RS-485 Lektriever Interface Converter.

With the locking console activated, the operator must enter a preassigned passcode prior to operating the machine.

CONSOLE LOCKED

Ten separate passcodes may be programmed into the OCC. A timeout feature may also be activated.

3 CODES, 60 SEC.

The OCC has an integrated safety status that visually and audibly alerts the operator that a safety circuit has been interrupted.

LEVEL: 1  
LOWER BEAM BLOCKED!

The OCC contains a "run time" or "cycle counter" that allows a supervisor to track the actual usage of a machine, providing vital information on productivity.

RUN TIME (MIN)  
30 MIN.

The OCC allows the operator to visually monitor the Lektriever's carrier load condition. It will even provide suggestions on how to rebalance the load.

ANALYZING IMBALANCE  
LOAD BALANCE IS OK!

The OCC is equipped with a visual maintenance alert that notifies the operator when routine preventative maintenance is required.

MAINTENANCE SERVICE  
RECOMMENDED

When used with one of Kardex's optional Material Control Software Packages, the OCC can display Part Number, Bin Location and Quantity On Hand.

PN: 385035445  
BIN: 4 Q: 2

When used with Kardex's Central Files software, the OCC acts as a host interface and has a two line, 20 character informational display. The software is really an inventory control system for active and inactive records. It allows the user to Add, Edit, Inquire, Charge-In, Charge-Out, Delete or Transfer a record out of the department.
